

Over Under

The "Over-Under" stacked Carbon/Anti-scale system is one of the most efficient scale reduction systems available. The high grade carbon bed reduces chlorine, organic chemicals, pesticides and more. The Anti-Scale media reduces the waters scaling potential through a nucleation assisted crystallization process. No electricity and no wasted back-wash water make the Hybrid-CA system our best selling water softening alternative.

Model Number	Service/ Peak GPM	App. Ship Lbs.	GAC Type	GAC ft ³	Height	Black Media Tank Sizes
HCA-11-1235	1-5/5	90	Coconut	1.0	65"	12x35/10x22
